

CITROËN

ami
100% ELECTRIC

BROCHURE

ami
100% ELECTRIC

100% ELECTRIC

AMI is the solution to electric urban mobility. It is priced to be as affordable as possible, by being as simple as possible. AMI enables the masses to enter electric mobility.

75 KM RANGE

AMI has the range needed for short daily journeys. This range is well in excess of the average distance travelled each day, so it's just as good for getting to an appointment, than at work or at a party with friends.

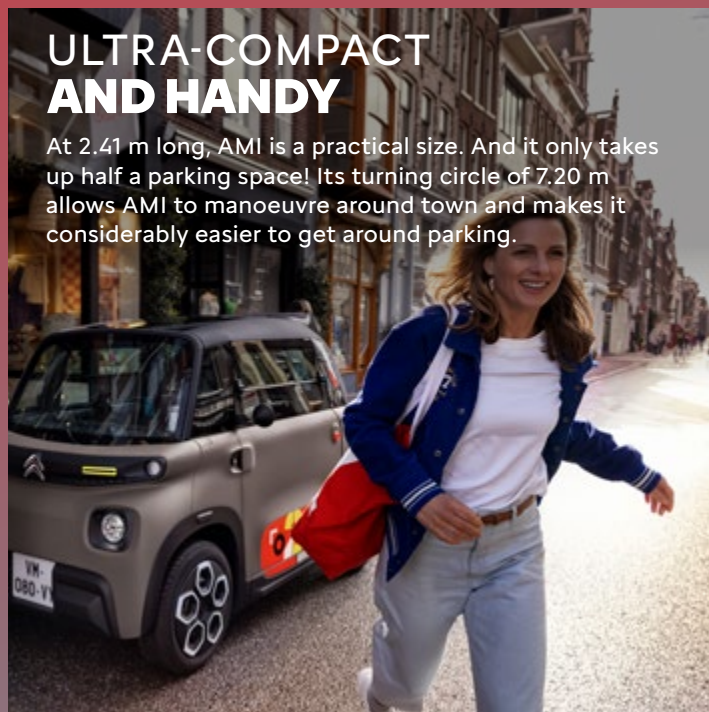

FULL CHARGE IN 4H (VIA WALL BOX WITH ADAPTER)

AMI can be recharged from a public charging point or Wall Box using an adapter which comes as standard on the vehicle.

ULTRA-COMPACT AND HANDY

At 2.41 m long, AMI is a practical size. And it only takes up half a parking space! Its turning circle of 7.20 m allows AMI to manoeuvre around town and makes it considerably easier to get around parking.

LARGE GLASS SURFACE

Thanks to its panoramic roof, AMI offers a real feeling of space and brightness, enhanced by the wide windscreen and side windows. These large windows provide excellent visibility for both driver and passenger.

APPLICATION MY CITROËN

The DAT@AMI* connected box gives you access to all AMI data: available range, mileage, time remaining for a 100% charge, maintenance alerts and the location of charging points. A USB socket is reserved for your smartphone.

** Available from accessories if AMI AMI, as standard with optional colour pack and PEPS model.*

ASTUCIOUS STORAGE

On board, every nook and cranny is exploited to the full: A storage area at the passenger's feet can accommodate a cabin-size suitcase. There are a number of other intelligent storage compartments in the cabin, particularly at the rear.

MY AMI PLAY

Access in total security to your favorite applications: navigation, music, radio, phonebook... via the "Citröen Switch" function, which allows you to connect your smartphone via Bluetooth and activate the "Citröen Switch" function. "My Ami Play" brings them together on the same page.

PRODUCTS LIFESTYLE
